

## YH-D206

Filament tape

## TECHNICAL DATA SHEET

### DESCRIPTION

The glass fiber tape is made of transparent PET film as the backing material, and the fiberglass yarn is reinforced to provide high tensile strength and anti-friction, anti-scratch and moisture-proof.

### PRODUCT APPLICATION

Packaging applications that require high viscosity, high strength, high tack (high shear).

### NOMINAL VALUES

The following data are nominal values based on PSTC, ASTM and other standard tests. The data should not be considered as specifications.

<b>Substrate</b>	PET
<b>Adhesive</b>	Synthetic rubber
<b>Initial Tack (#)</b>	16
<b>180° Peel strength (N/25mm)</b>	20
<b>Holding power (hours)</b>	≥48
<b>Total Thickness (mic)</b>	650
<b>Initial Tack Tensile Strength (N/25mm)</b>	≥25N/100mm
<b>Percentage of breaking elongation (%)</b>	6

Rolls: 50mm \* 50m \* 120mic /pcs.
